

## Clients with Mental Illness & Substance Abuse Disorder by RSN by Age.

**Operational Definition:** Percent of mental health outpatient clients who had both a mental illness diagnosis and a substance abuse diagnosis and/or substance abuse impairment in the Fiscal Year by RSN.

**Operational Measure:** Number of outpatient recipients who had a mental illness diagnosis and a substance abuse diagnosis or substance abuse impairment during the Fiscal Year divided by the total number of outpatient recipients in the Fiscal Year.

### Formulas:

Number of outpatient recipients who had a mental illness diagnosis and a substance abuse diagnosis and/or impairment  
in the Fiscal Year by RSN  
{0-17, 18-59, 60+}

---

Number of clients receiving community outpatient services in Fiscal Year by RSN  
{0-17, 18-59, 60+}

**Discussion:** This indicator shows the percentage of child, adult, and older adult outpatient mental health service recipients who have both a mental illness and substance abuse disorder. The percentage of people served in outpatient mental health services with mental illness and substance abuse disorders has increased for all age groups across the 3 fiscal years.

### Data Notes:

- All Diagnoses are reported using the ICD-9 classification.
- A substance abuse disorder is identified by using two data elements from the January 2002 Data Dictionary: (1) Diagnosis of substance abuse and/or (2) Impairment kind of “D” at any time in the FY.
- A person’s diagnosis is determined by taking the most recent diagnosis and applying a precedence table to pick one diagnosis. A mental illness diagnosis includes all mental illness diagnoses except dementia, mental retardation, autism, or personality disorders.
- The RSN count shows the number of unduplicated clients within each RSN (i.e., one person is counted in each RSN in which they received services).
- The Statewide counts show the number of unduplicated clients across RSNs (i.e. even if a person receives services in more than one RSN, they are only counted once in the Statewide total).
- Age is calculated as of January 1, yyyy for each Fiscal Year.
